About us.

Suzuki stone is one of the leading quarry owner, processor and exporter of Kota stone, Black basalt and Sandstone. Being one of the few groups to take the path less travelled has helped us reach where we are.

With an experience of more than 2 decades, we want to tell the story of generations through stones. As nature is the most magnificent thing, we have around us, we aim to create human interaction with pieces of nature through our products.

Infrastructure.

Established in 1998 from an abandoned rented factory to being the benchmark setters in the industry and innovating the stone.

With over 5 Working quarries and 7 Factories, SUZUKI STONE is a brand that everyone cherishes and prefers.

Raising the standards of for-granted Kota Stone with superior quality and state-of-the-art technology, we have always introduced something different and unique to the market that has helped set a different value for the stone

Natural Stone

As nature is the most magnificent thing, we have around us, we aim to create human interaction with pieces of nature through our products.

Kota Stone is available in different shapes and sizes and can easily blend with any home interior or exterior flooring design.

Riverwash

Riverwash is the brushed finish on the natural surface, that helps us to intact the natural colour and feel of the stone. River wash finish helps to maintain the anti-slip surface of the stone and thus it can be used in both outdoor and indoor areas.

KOTA BLUE

Sombre

It is a finish in which the natural stone is ground to a smooth and consistent surface while retaining its natural look. When natural stone is honed the polish or shine is removed to produce a non-reflective matte finish.

Leather

A leathered finish is a newer style that is gaining more traction in the design world. It features a soft sheen that is less than polished granite but includes a textured appearance. The stone's subtle, dimple-like texture is achieved when diamond-tipped brushes are run on top of the honed stone.

KOTA BLUE

Blasted

The Concrete surface is peened by steel shots at high velocity, to impart a slightly roughened surface. The aggregates will be of contrasting colours, which would further increase the 'character' of the paving material and it would be imparting some evenness to the concrete.

Lappato

The word Lappato has been derived from some Italian words. This finish is the next process of leather finish wherein special abrasives are used to achieve the final finish which is a combination of matt and gloss, less reflective and has a granular worn-out but highly elegant look.
